

Support and Development Fact Sheet

The Alfred is committed to advancing the practice of nursing through its investment in nursing education, professional development and research opportunities. We strive to provide a positive and supportive environment that enables nurses to reach their professional potential and enjoy their work.

We have a customised orientation package that will enhance the transition through which you will be supported by our three full-time (Grade 4) Clinical Support and Development Nurses.

Ongoing development of our staff is a high priority at The Alfred. Informal in-services are conducted on a weekly basis, covering a wide variety of clinical topics.

Each year the Operating Suite facilitates students undertaking the Post Graduate Diploma of Perioperative Nursing (major Perioperative or Perianaesthesia) that is run in conjunction with La Trobe university. We conduct a Novice Practitioner Program on a yearly basis, designed specifically for Division One Registered Nurses who are interested in embarking on a career in the Operating Suite.
