Coronavirus (COVID-19)  
Clearance from isolation criteria

Clearance will be conducted by either DHHS or Alfred Health based on the following criteria:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
| A) | **Asymptomatic COVID-19**  
The patient remains asymptomatic after a positive test.  
Isolation can be discontinued if:  
• ≥ 10 days have passed since the positive test  
• No symptoms of COVID-19 have emerged |
| B) | **Mild COVID-19**  
The patient does not warrant hospital admission.  
Isolation can be discontinued if:  
• ≥ 10 days have passed since the onset of symptoms  
• Resolution of fever **AND** acute respiratory symptoms for ≥ 72 hours |
| C) | **Moderate-severe COVID-19**  
Needs hospital admission directly related to COVID-19.  
Isolation can be discontinued if:  
• 14 days from onset of symptoms  
• Complete resolution of fever for 72 hours  
**AND**  
• Resolution of acute symptoms for 72 hours  
**OR**  
• Substantial resolution of symptoms and two PCRs 24 hours apart ≥ 11 days into illness |
| D) | **Immunocompromised**  
Defined in cessation guideline.  
Isolation can be discontinued if:  
• Meets A), B) or C) above, as appropriate  
• Two negative PCRs, 24 hours apart, ≥ 7 days after illness onset |
