

Horizon Place - part of the HIV Service is changing

the**Alfred**

Tell us what you think

The type of care that people living with HIV require is continuing to change.

To make sure we provide patients with the care they need, we are changing our Horizon Place service.

As the need for supported accommodation at Horizon Place has reduced, our plan is to direct resources into:

- outreach support for people in aged care and supported care services
- increased regional services for people living with HIV
- more support for HIV positive women having children
- new options for respite and short term stays.

Tell us what you think about this change by Tuesday 18 April, 2017

- the online feedback form on our website
- the feedback postcard available at Horizon Place, Fairfield House or ID Outpatients at The Alfred.
