

PHYSIOTHERAPY

Alfred Health is one of Victoria's leading and largest public hospital networks. It services Melbourne's greater metropolitan area and provides state wide specialty care services. Alfred Health incorporates The Alfred, Caulfield Hospital and Sandringham Hospital. There are 32 exciting and challenging four month rotations on offer across the three campuses, including a remote opportunity to work in Alice Springs

The depth of expertise among our Senior Physiotherapy Clinicians provides excellent clinical support for New Graduates starting their career. Our departments are committed to excellence in the provision of physiotherapy care, while maintaining a relaxed and professional team environment. We provide a dynamic interactive workplace with each stream consisting of very experienced and enthusiastic senior clinicians. All campuses encourage a friendly environment and we have regular cross campus social events.

Professional Development

- Excellent clinical supervision and the opportunity to work with world class physiotherapists
- Regular in-services both stream specific and departmental
- Structured competency program
- Opportunities for involvement in quality and research projects
- ICU, Trauma and airway clearance courses run annually for staff.
- Alfred wide learning opportunities for professional development.

Research

Alfred Health's Physiotherapy team is well known for its high quality research output which aims to improve patient outcomes and advance physiotherapy knowledge. There are many opportunities to participate as a Grade 1 Physiotherapist.

Staff Benefits

- Salary packaging (extra \$ in your pocket!)

PHYSIOTHERAPY

THE ALFRED

The Alfred is one of Australia's leading acute hospitals. The Alfred has one of Australia's busiest Emergency and Trauma Centres, the state's largest Intensive Care Unit and is home to multiple state-wide services, including Adult Burns, Adult Cystic Fibrosis, HIV, Adult Heart and Lung Transplantation. It is also the national Paediatric Lung Transplantation service.

The Alfred Physiotherapy Department has a proud history of clinical and academic excellence. It remains strongly committed to further pursuing excellence in physiotherapy.

Grade 1 rotations include:

- Respiratory / Lung Transplant
- Cystic Fibrosis
- ICU
- Cardiothoracic / Cardiology
- Trauma
- Orthopaedic Inpatients
- Outpatient Musculoskeletal
- Burns and Plastics
- Neurosciences
- Oncology and Renal
- Infectious Diseases
- General Medicine
- Alice Springs Rotation

CAULFIELD HOSPITAL

Caulfield Hospital Physiotherapy Department provides an intensive specialist service to Caulfield Hospital's rehabilitation and aged care clients in a multidisciplinary team environment. Caulfield Hospital has recently opened the doors to its state of the art ABI Rehabilitation Centre. Caulfield is also our leading state wide non- traumatic spinal service as well as one of Victoria's largest amputee services. Assessment and treatment occurs on an inpatient or outpatient basis in modern Physiotherapy gyms and facilities, including an on site hydrotherapy pool for rehabilitation purposes.

Grade 1 rotations include:

- Neurological Rehabilitation
- ABI Rehabilitation
- Spinal Rehabilitation
- Orthopaedic Rehabilitation
- Amputee Rehabilitation
- Better at Home Rehabilitation
- Cardiac Rehabilitation
- Aged Care Rehabilitation
- Community Rehabilitation

SANDRINGHAM HOSPITAL

The Sandringham Physiotherapy Department provides a service to inpatients referred from the orthopaedic, general medical, general surgical wards, sub-acute / rehab beds and the Emergency Department. Services are also provided to the Women's Hospital which is onsite at Sandringham and provides obstetric and gynaecological services.
